TECHNICAL SUMMARY

Computer Science Engineering student with a strong interest in software development, backend systems, and artificial intelligence. Experienced in building web applications and data-driven tools using Java, Python, React, and Node.js. Enjoys debugging code, solving logical puzzles, and developing scalable solutions to real-world problems.

EDUCATION

B.Tech – Computer Science and Engineering Undergraduate [2028].
CVR College of Engineering.

TECHNICAL SKILLS

Java | DSA | C | Python | HTML | Tailwind CSS | Node.js | AI & ML Fundamentals | Prompt Engineering | NLP | Git | GitHub | VS Code | Vercel | Backend Development | System Design Fundamentals

PROJECTS

Skillora - AI Skill Development Platform

- Architected an end-to-end platform using Python and SQLite to automate personalized learning pathways through intelligent skill discovery.
- Engineered modular frontend components to ensure system scalability and code reusability.
- Developed AI-driven logic for tailored content recommendations, enhancing user engagement with structured modules.

Sentilytics - Sentiment Analysis Dashboard

- Built an NLP pipeline in Python to process large-scale textual feedback for real-time sentiment classification.
- Implemented automated text summarization and word frequency analysis to transform raw data into actionable insights , reduced processing time drastically (20-25%) , could almost process 10k+ comments in less than a minute.
- Designed an interactive dashboard to visualize complex sentiment trends for data-driven decision-making.

WareWise - Inventory & Expiry Management

- Developed a robust monitoring system using React and Node.js to track real-time stock levels and product expiry dates.
- Optimized database schemas to support automated restock alerts, reducing manual tracking overhead.
- Streamlined inventory workflows by designing a high-performance interface for efficient data updates.

ACHIEVEMENTS & ACTIVITIES

Oracle AI Foundations Associate : Certified in core Artificial Intelligence concepts and cloud foundations.

Smart India Hackathon : Selected at the college level for project innovation.

Computer Society of India (CSI) : Active member participating in technical initiatives.

Syntax - Technical Magazine (Volume 4) : Editor contributing to technology publication.

Interact Club : Member participating in leadership and community initiatives.
