Portfolio

EDUCATION

CVR College of Engineering, Hyderabad

B.Tech in Computer Science and Engineering

2024 – 2028

CGPA: 8.98

Resonance Junior College, Hyderabad

Intermediate (MPC)

2022 – 2024

Percentage: 94.8%

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js

AI / Machine Learning: Scikit-learn, Pandas, NumPy, TensorFlow, Transformers, NLP, Sentiment Analysis

AI Developer Tools: OpenAI API, Claude Code, GitHub Copilot

Tools & Databases: Git, SMTP Libraries, SQL, MySQL, PostgreSQL, Database Design, Normalization

SOFT SKILLS

Leadership & Collaboration: Proven ability to lead technical teams and coordinate cross-functional workshops as a Cybernauts Club member.

Adaptability: Rapidly learning and implementing emerging AI technologies like LLMs and RAG frameworks.

Problem Solving: Strong analytical approach to debugging system architectures and optimizing ML pipelines.

Communication: Skilled at technical storytelling and knowledge sharing through student workshops.

PROJECTS

MeetWise – AI Meeting Summarizer / Whisper, BART, FFmpeg, Python

- Built an AI-driven system that processes meeting audio, video, and documents to generate structured summaries.
- Extracts action items and deadlines and automatically emails tasks to corresponding team members.
- Utilized Whisper for speech-to-text and BART for hierarchical summarization for high context retention.

LUNA – AI Personal Voice Assistant / Python, Speech Recognition, GUI

- Developed a desktop voice assistant capable of automation tasks such as YouTube playback and system controls.
- Integrated speech recognition and GUI components to enable interactive voice-based interaction.

SMS Spam Classifier / Python, Scikit-learn, TF-IDF

- Built an End-End machine learning classifier achieving **98% accuracy** and **100% precision** on **imbalanced datasets**.
- Implemented text preprocessing and optimized the classification pipeline using Multinomial Naive Bayes.

LifeLine AI – Mental Health Support System / NLP, Sentiment Analysis

- Designed an AI system using sentiment analysis to detect emotional distress and provide intervention support.
- Identifies negative sentiment patterns to assist in reducing potential risks through automated pattern detection.

CERTIFICATIONS

Deloitte Data Analytics Job Simulation – Forage

Advanced Prompt Engineering – Simplilearn

Introduction to Generative AI – Google Cloud / Simplilearn

LEADERSHIP AND ACHIEVEMENTS

Selected for **Smart India Hackathon 2025** at the college level.

Technical Member – **Cybernauts Club**, CVR College of Engineering.

Coordinated multiple technical workshops and talks contributing to technical knowledge sharing.
