PROFILE SUMMARY

- Computer Science and Engineering student passionate about Artificial Intelligence, automation, and web development.
- Experienced in building AI-based projects and intelligent systems using Python, Streamlit, and NLP.
- Strong foundation in programming (C, C++, Python) with a drive to create innovative real-world solutions.

EDUCATION

Degree

B.Tech – CS

KEY ACHIEVEMENTS

- Represented CVR Engineering College in **Smart India Hackathon 2025**, successfully clearing the internal round.
- Actively contributing as a **Technical Member** in the Cybernauts Club, focusing on AI projects and DSA practice.

PROJECTS

LUNA – AI Personal Assistant

- Developed a futuristic AI personal assistant with **voice recognition**, **reminders**, **YouTube playback**, and **Google search**.
- Created using Python with GUI integration, ensuring smooth automation and user interaction.

Lifeline AI – Wellness and Habit Tracker

- Built an AI-driven lifestyle assistant for **habit tracking**, **mood monitoring**, and **smart reminders**.
- Implemented adaptive insights using NLP-based emotional analysis for user well-being.

SMS Spam Classifier

- Designed an AI model with **97% accuracy** using **TF-IDF vectorization** and a **PassiveAggressiveClassifier**.
- Built an efficient preprocessing pipeline and text classification system in Python.

Revcap – Reverse Time Capsule

- Created a web app that stores **text, audio, and video messages** to be unlocked on future dates.
- Built entirely using free tools like Streamlit and integrated AI features for user reminders.

Doctor AI – Virtual Health Assistant

- AI-powered virtual doctor that interprets voice/text symptoms and gives primary diagnosis suggestions.
- Utilizes NLP and predictive modeling to connect users with the right medical specialists.

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, HTML, CSS, JavaScript
- **AI/ML:** Natural Language Processing, Machine Learning, Generative AI, Prompt Engineering
- **Tools & Platforms:** Streamlit, Jupyter Notebook, Git, Docker, PyWhatkit, Vercel, Smtplib, GCP, AWS
- **Other:** GUI Development, Web Automation, API Integration

INTERESTS & INVOLVEMENT

- Exploring AI models, participating in hackathons, and developing intelligent web-based tools.
- Interested in automation systems, modern web design, and building scalable AI solutions.
